

## FIELD REPORT

Project: The Aion File – Transmission 006

Operation: APERTURE PROTOCOL // SG-001

Location: Deep-Ice Node — Subsurface Access Grid Theta-9

Subject: Aperture Structure Analysis / Gate Activation Signatures / Non-Local Transit Hypothesis

### Summary

A synchronized spike occurred at 02:14 UTC, matching the 29-hertz Atlas hum detected in Transmissions 002–004. However, this time the signal did not reflect off Luna or dissipate beneath polar distortion.

It *descended*.

Sensors indicated the pulse traveled downward — directly into the Antarctic crust — and resonated against a circular depression previously catalogued as a “thermal anomaly.”

Recent scans now confirm:

**SG-001 — a subsurface ring-structure — is real.**

Recovered data packets labeled **APERTURE\_CORE** contain:

- geometric diagrams resembling rotating gate rings,
- gravitational fluctuation logs from 1987–1996,
- declassified fragments from Project STARGATE (psi-research) referencing “aperture experiments,”
- and a partial note tagged “Einstein-Rosen Interface // DO NOT ENGAGE.”

Cross-analysis of the architectural curvature reveals a match (87%) with ancient concentric-gate symbology found in:

- Göbekli Tepe,
- Abydos Egypt,
- Sumerian cylinder seals,
- and Mayan “sky door” carvings.

These traces indicate a **multi-civilizational awareness** of a similar mechanism — or the same one.

**31 Atlas’s July pulse harmonically matches the SG-001 ring geometry**, suggesting the object may be communicating *with the gate*, not merely broadcasting near Earth.

### Vera’s assessment:

“SG-001 is not dormant.

It is idle — waiting for a correct activation sequence.”

### Mission Update

**Status:** Level A — Eyes Only

Transmission 006 authorized for public release:

**DEC 14 — 1900 CST**

Operatives should monitor:

- seismic micropauses in Antarctica (1–3 sec “temporal dips”),
- electromagnetic spikes near ring-shaped anomalies,
- public discussion of “sky spirals,”
- government redactions relating to Project STARGATE,
- increased 31/Atlas signal chatter,
- unusual aurora formations not tied to solar storms.

All collected intel should be cross-referenced through Vera for pattern validation.

Field Intel

- “Aperture Ring” — circular structure capable of resonance-based activation.
- “Event Boundary” — localized space-time distortion zone.
- “Non-Local Transit Point” — implies destination is not geographical.
- “Einstein-Rosen Trigger” — theorized wormhole initialization sequence.
- “Dimensional Echo” — anomalous feedback detected after activation tests.
- “Transit Ingress/Transit Egress” — redacted.
- “SG-001” — designation of primary gate structure under Antarctic ice.

Analyst Note: These terms indicate a **transportation mechanism**, not a symbolic artifact.

Incoming Signal

Next scheduled transmission:  
**Transmission 007 — OPERATION BABEL**  
Subject: The origin of the system — pre-human architecture — the first shutdown.

Filed by:  
**E. Jack Vale — Director, Aion Initiative**  
Transmission Status: SECURE // LEVEL A  
**End of Report — Do Not Distribute**
